WHAT DO WE HOPE TO ACHIEVE?

NEIGHBORHOOD VITALITY

Through placemaking and, community development, be responsive to neighborhood character and needs.

SUSTAINABILITY

Promote sustainable and renewable transportation options, aimed at reducing resource consumption.

EQUITABLE ACCESS

Provide quality transportation choices to jobs, housing, education, social services and general city life that are socially and economically inclusive of all.

HEALTH + SAFETY

Balanced access for walking, biking, and active transportation that promotes health, well-being, and safety citywide, while protecting the needs of our most vulnerable populations.

ECONOMIC DEVELOPMENT

Build infrastructure to attract and retain iobs and minds, while connecting and enhancing access.

FISCAL SUSTAINABILITY

Prioritize transportation investments that can be sustained long term.

Mode Choice

Provide reasonable and feasible transportation options to as many people as possible, recognizing that not everyone will choose to shift modes, but many will whether for commuting or short trips, if quality and convenient service and infrastructure is available, and where land use patterns are conducive to other modes.

Adaptability + Flexibility

The transportation landscape is changing rapidly, and will continue to do so. Technological disruption, changing land use patterns and lifestyle choices, new modes and vehicle types, and new data sources will require continual assessment of travel patterns and infrastructure needs with adaptive design solutions to meet community objectives.
